6. To clear all detected rogue devices from the list, click **Clear Detected Rogues**.

Note: To avoid the Mitigator's database becoming too large, Siemens recommends that you either delete Rogue APs or add them to the **Friendly APs** list, rather than leaving them in the **Rogue** list.

To add an AP from the Mitigator scan results to the list of friendly APs:

1. From the main menu, click **Mitigator**. The **Mitigator** screen is displayed.
2. Click the **Rogue Detection** tab.
3. To add a Wireless AP to the **Friendly APs** list, click **Add to Friendly List**. The AP is removed from this list and is displayed in the **Friendly AP Definitions** section of the **Friendly AP's** tab.

To delete an AP from the Mitigator scan results:

1. From the main menu, click **Mitigator**. The **Mitigator** screen is displayed.
2. Click the **Rogue Detection** tab.
3. To delete a specific AP from the Mitigator scan results, click the corresponding **Delete** button. The AP is removed from the list.
4. To clear all rogue access points from the Mitigator scan results, click **Clear Detected Rogues**. All APs are removed from the list.
